

UNF- Funded master's opportunity with Dr. Pruthvi Manjunatha

I am looking to hire two students for the master's program (with Thesis option) at UNF in Jacksonville Florida, USA.

The deadlines for applying:

- Spring (January) 2026 term is October 1, 2025
- Fall (August) 2026 term is April 1, 2026

The position will be fully funded. The students are expected to work on traffic engineering research projects and work as graders/ teaching assistants. Please note: The continuation of funding is subject to student performance.

The master's program details can be found here:

<https://catalog.unf.edu/programs/CIV-CCEC-MSCE-MAJOR>

Application details can be found here:

<https://catalog.unf.edu/resources/admissions/graduate#standard-requirements>

Florida is one of the top states in the US for transportation engineering job opportunities. UNF is a part of the state university system in Florida. At the end of their master's, the students can potentially transfer to a PhD program in other state universities.

Required qualifications/skills:

1. Students must have completed an undergraduate degree or in their final year of degree
2. The degree must be in civil engineering, transportation engineering, industrial engineering or related fields
3. [Meeting English language proficiency requirements](#)
4. Proficiency in at least one programming language

The following are not required but desired:

1. Experience with research projects or internships
2. Good academic performance
3. Participation in student chapters and activities beyond the classroom
4. Demonstration of communication skills (written and spoken)
